# Lincolnshire Community Health Services NHS Trust

## Continence Products Formulary

### Policy Statement

<b>Background</b>	The Formulary has been developed to promote consistency of product choice across LCHS Trust and to be used as a vehicle for promoting best practice in the use of continence products
<b>Statement</b>	The products listed in this formulary have been selected by the Continence Formulary working Party, Lincolnshire Community Services NHS Trust, Lincolnshire localities only. Judgement was based on expert opinion and evidence of clinical and cost-effectiveness.
<b>Responsibilities</b>	Compliance with the guidance will be the responsibility of clinical LCHS staff. The guidance has been developed after consultation with Primary Care Practitioners with expertise in this speciality, Information Governance Department, Procurement and the Business Team.
<b>Training</b>	Promotion of continence and management of incontinence training, product training and care pathways are in place to support staff during the process of prescribing containment products.
<b>Dissemination</b>	Electronically via the LCHS Website
<b>Resource Implication</b>	This does not have any financial implications on the organisation.
<b>Consultation</b>	The guidance has been developed in line with the NHS Litigation Authority (NHSLA) guidelines to provide a framework for staff within NHS organisations to ensure the appropriate production, management and review of organisation wide policies.

### **Guidance on the use of the formulary**

The products listed in this formulary have been selected by the Continence Formulary working Party, Lincolnshire Community Services NHS Trust, Lincolnshire localities only. Judgement was based on expert opinion and evidence of clinical and cost-effectiveness.

**The products recommended should be the first choice and would be suitable for the majority of patients.**

However, patients are individuals and after a clinical assessment it may be appropriate to choose an alternative product, which would be more effective in specific cases.

This formulary should be used in conjunction with the continence good practice guide (DH April 2000) and policies, as endorsed by Lincolnshire Community Services NHS Trust.

Although most community pharmacies will stock the most common products, 48 hours notice may be required to order some continence products.

Always prescribe the quantity rather than original pack (op). OP may be interpreted as a single item or piece. Community pharmacists will be able to advise on the correct pack size.

Further advice and support is available from your local Continence Nurse Specialist Via Operations Team 0300 123 4868

Requests for items to be added to the formulary should be directed to your local Continence Nurse Specialist or The Clinical Medicines Team. (Prices correct as of June 2017 Drug Tariff)

## Urinary Catheters

- Attention is drawn to NSPA RRR02, female urinary catheters causing trauma to adult males, issued 30 April 2009. Vigilance is urged when prescribing or using catheters in men.
- A prescription must be authorised by the prescriber prior to any ordering/delivery of catheters, this will prevent excessive ordering, both in quantity and frequency.
- All catheters listed have universal fittings for any make of leg or night bags.
- If problems persist i.e frequent re-catheterisation, bypassing, blocking, contact your local Continence Nurse Specialist for advice.
- Prescribe two urinary catheters initially and then one at a time.

### **Foley Catheters: For short/medium term use – Adult** Recommended use up to 28 days

<b>TELEFLEX RUSCH PTFE AQUAFLATE. PTFE coated latex with sterile water filled syringe for balloon inflation and empty syringe for balloon deflation</b>							<b>Usual Quantity</b>
Standard	Cat. No	DP3101	10ml balloon	Size	12-24 CH	£2.16 each	1 every month
Female	Cat. No	DP2101	10ml balloon	Size	12-24 CH	£2.16 each	1 every month

### **Foley Catheters: For long term use – Adult** Recommended use up to 12 weeks

#### **1<sup>st</sup> Choice:**

<b>TELEFLEX RUSCH BRILLIANT AQUAFLATE. All-silicone long term catheter with sterile water filled syringe for balloon inflation and empty syringe for balloon deflation</b>							<b>Usual quantity</b>
Standard	Cat No	DA310112- DA310124	10ml balloon	Sizes	12-24	£6-11 each	1 every month
Female	Cat No	DA210112- DA210124	10ml balloon	Sizes	12-24	£ 6-11 each	1 every month

**2<sup>nd</sup> Choice:**

<b>TELEFLEX RUSCH SYMPACATH AQUAFLATE Hydrogel coated latex with sterile water filled syringe for balloon inflation and empty syringe for balloon deflation.</b>							<b>Usual Quantity</b>
Standard	Cat. No	DA3101 12-24	10ml balloon	Size	12-24 CH	£6.07 each	One every 12 weeks
Female	Cat. No	DA2101 12-24	10ml balloon	Size	12-24 CH	£6.07 each	One every 12 weeks

**3<sup>rd</sup> Choice:**

<b>COLOPLAST Folsil X-Tra silicone open ended catheter with pre-filled syringe for balloon inflation and empty syringe for balloon deflation</b>							<b>Usual Quantity</b>
Standard Length	Cat No.	AA8C12- AA8C18	Balloon Size 10	Size	12-18	£6.38	One every 12 weeks

**Nelaton Catheters: For Intermittent Self Catheterisation**

- These are for single use only
- Suitable for patients with incomplete bladder emptying e.g neurogenic bladder disorders, particularly patients with multiple sclerosis, spina bifida, diabetes and spinal cord injuries
- Patients need good dexterity and cognitive ability
- Help to reduce catheter associated urinary tract infections
- How many a patient uses a day depends on their medical reason for single use ranging from 1 to 5 times daily

**1<sup>st</sup> Choice**

<b>MACGREGOR Qufora Two step (sterile nelaton catheter need to add water)</b>							<b>Usual Quantity</b>
Male	Cat No.	361412 – 361416	Size	12-16	£25.80 per pack	86p each	30 (1 pack) per month maximum 4
Female	Cat No.	361210 – 361214	Size	10-14	£25.80 per pack	86p each	30 (1 pack) per month maximum 4

## 2<sup>nd</sup> Choice

<b>B BRAUN MEDICAL Actreen Hi-Lite gel lubricated single use nelaton catheter</b>							<b>Usual Quantity</b>
Male	Cat No.	238208E	Size	8-16	£44.50 per pack	£1.48 each	30 (1 pack) per month Maximum 4
Female	Cat No.	238306E	Size	6-16	£44.50 per pack	£1.48 each	

## 3<sup>rd</sup> Choice

<b>B BRAUN MEDICAL Actreen Glyc set (nelaton catheter with urine drainage bag)</b>							<b>Usual Quantity</b>
Male	Cat No.	226208E – 226218E	Size	8-18	£61.55 per pack of 30	£2.05 each	30 (1 pack) per month Maximum 4
Female	Cat No.	226306E – 226316E	Size	6-16	£61.55 per pack of 30	£2.05 each	

- **Catheter drainage bags**

### 3.1 Leg bags

- All catheter drainage bags connected directly to a catheter should be sterile
- Leg bags may be worn in different positions on the leg i.e inside thigh/calf, which is an individual choice, and this will determine the length of the inlet tube.
- Maintaining a closed drainage system (i.e not removing the leg bag when attaching a night bag) reduces the risk of infection
- The leg bag must remain connected to the catheter and linked to the night bag if additional drainage capacity is required overnight
- If a bag becomes contaminated or disconnected from the catheter, it must be changed

**Leg bags should be changed every 5 to 7 days (manufacturer's recommendation)**

**No more than one box of ten should be issued on alternate months  
(6 x 10 boxes per year)**

### 1<sup>st</sup> Choice

<b>L.I.N.C MEDICAL LTD</b>			
<b>Leg Bag – 10 piece per box, 1 pair of elasticated Velcro straps with silicone snake for comfort, a pair of scissors is included with the adjustable tubes</b>			
<b>Size</b>	<b>Cat. No.</b>	<b>Cost per 10</b>	<b>Usual Quantity</b>
350ml 10cm tube with tap	LM350MD-T	£20.55	10 every 2 months  ( 1 pack every 2 months )
350ml Direct inlet T-tap	LM350SD-T	£20.55	
350ml 10cm tube with swivel	LM350MD-S	£19.50	
500ml 10cm tube with tap	LM500MD-T	£21.00	
500ml 30cm tube with tap	LM500LD-T	£21.00	
500ml 10cm tube with swivel	LM500MD -S	£21.00	
500ml Direct inlet tube lever tap	LM500SD-L	£22.09	
500ml Direct inlet tube, T-tap	LM500SD-T	£22.13	
750ml 10cm tube (short) with swivel	LM750MD-T	£22.00	
750ml 30cm tube (long) with tap	LM750LD-T	£22.00	

### 2<sup>nd</sup> Choice

<b>Bard LDT Sprit Bags – 10 piece per box with 1 pair of sterile latex gloves and 1 pair soft Velcro straps</b>			<b>Usual quantity</b>
<b>Size</b>	<b>Cat no</b>	<b>Cost per 10</b>	
350ml short tube with lever tap	DSL350S	£24.00	10 every two months (1 pack every two months )
500ml short tube with lever tap	DSL500S	£24.00	
750ml short tube lever tap	DSL750S	£24.00	
350ml long tube lever tap	DSL350L	£24.00	
500ml long tube lever tap	DSL500L	£24.00	
750 long tube lever tap	DSL750L	£24.00	
750ml variable tube (60cm) lever tap	DSL750V	£24.00	

<b>Teleflex Medical Rusch Belly Bag with sample port</b>			
<b>Size</b>	<b>Cat. No.</b>	<b>Cost</b>	<b>Usual Quantity</b>
1 Litre Bag	B1000p	£10.70	1 bag per month

### 3.2 Night drainage bags - Sterile

#### FOR PATIENTS IN THEIR OWN HOMES AND RESIDENTIAL HOMES:

Sterile drainable 2 litre night bags to be connected directly to catheter

For indwelling catheters only

Drainable night bags should be changed every 5 to 7 days (manufacturer's recommendation)

**No more than one box of ten should be issued on alternate months (6x10 per year)**

#### 1<sup>st</sup> Choice

TELEFLEX MEDICAL RUSCH sterile 2 litre drainable night bag		
Cat No.	Cost per 10	Usual Quantity
850420 lever tap	£10.62 per 10	10 every 2 months
850421 slide tap	£10.62 per 10	10 every 2 months

#### 2<sup>nd</sup> Choice

Bard Spirit bed bags		
Cat No.	Cost per 10	Usual Quantity
DSBB2000 Lever tap	£11.00 per 10	10 every 2 months

## Night drainage bags non-sterile

### FOR COMMUNITY PATIENTS – NURSING AND RESIDENTIAL HOMES

Non-drainable night bags (single use) connected to the leg bag to maintain a closed system.

- Suitable for night time use for the collection of urine from indwelling catheters or urinary sheaths
- The position of the bag should be below bladder level to enhance drainage
- Non-drainable night bags are the preferred option as single use reduces the risk of infection.

**No more than three boxes of ten should be issued monthly**

#### 1<sup>st</sup> Choice

<b>TELEFLEX MEDICAL</b> Non sterile 2 litre bag single use, T-tap			
<b>Cat No.</b>		<b>Cost of pack</b>	<b>Usual Quantity</b>
850422		£9.41 for a pack of 30 32p per bag	1 pack per month (max 30 per month)

#### 2<sup>nd</sup> Choice

<b>UNOMEDICAL CARELINE</b> Non sterile 2 litre bag single use, EasiMT			
<b>Cat No.</b>		<b>Cost of pack</b>	<b>Usual Quantity</b>
47-60-LBH		£3.35 for a pack of 10 34p per bag	3 packs per month (max 30 per month)

#### 4.0 Catheter Maintenance Solutions

##### Only as part of a treatment programme

- There should be a clinical rationale for use
- Should be used to prolong the life of the catheter, thus avoiding the trauma/risks of increased catheterisations
- Should only be used to treat indwelling catheters in prevention of encrustations, or to dissolve crystal formation to maintain patence of the catheter
- It is good practice to cut open catheters on removal, from those patients where blocking is a problem to see if the lumen is blocked by sediment deposit or crystals
- Two sequential instillations of a small volume are more effective than a single administration (Getliffe 2000)
- Bladder instillations or washouts must not be used to prevent catheter associated infections (Nice 2012)

Product	Cat No.	Size	Cost	Usual Quantity
Urotainer Twin Suby G (3.23% citric acid)	9746609I	2 x 30 ml	£4.81	Dissolving crystals by urease producing bacteria
Urotainer Twin Solution R (6.0% citric acid)	9746625I	2 x 30ml	£4.81	
Bard Optiflo Sodium chloride 0.9%	CSS50	50ml	£3.36	Removal of small blood clots and debris

#### 5.0 Catheter Valves

- For use with indwelling catheters only
- These provide a discreet alternative to drainage bags
- Should be changed every 5 to 7 days
- Contraindicated in:
  - o Reduced bladder capacity
  - o No bladder sensation
  - o Cognitive impairment
  - o Poor manual dexterity

**No more than one packet (5) should be prescribed**

L.I.N.C MEDICAL SYSTEMS LTD	Cat No.	Cost per 5	Usual Quantity
Care-flo catheter valve	CF1	£7.53	5 per month

## 6.0 Tubing and Accessories

- It is extremely important that both the catheter and leg bag are well supported to reduce traction and trauma to the bladder neck and urethra.
- The fixation strap is used as a retaining strap which secures the tubing or catheter firmly and comfortably against the leg acting as a shock absorber for indwelling catheters.
- GB fix It strap and Urisleeve are washable and reusable
- Urisleeve can be used as an alternative or alongside leg straps, particularly good for frail skin, or problems with straps digging into or rubbing against the legs as it distributes the weight of the urine more uniformly

**Pack of 5 GB fix It straps should last four to six months**

**Pack of 4 Urisleeves should last for six months**

**Box of 5 Catheter Clips should last a month**

<b>GREAT BEAR HEALTHCARE LTD</b>	<b>Cat No.</b>	<b>Cost per 5</b>	<b>Usual Quantity</b>
GB Fix It Strap – Short	10646C	£14.10	1 pack of 5 every 6 months
GB Fix It Strap – Adult	10644A	£14.10	
GB Fix It Strap – Abdominal	10645B	£15.43	
Gb Fix It Strap – Adjustable 150cm (cut to fit)	10647D	£17.78	
<b>BARD URISLEEVE</b>	<b>Cat No.</b>	<b>Cost per 5</b>	<b>Usual Quantity</b>
Small (24-39cm)	150111	£8.14	1 pack of 4 every 6 months
Medium (36-55cm)	150121	£8.14	
Large (40-70cm)	150131	£8.14	
Ex-Large (65-95cm)	150141	£8.14	
<b>Optimum Medical</b>	<b>Cat No</b>	<b>Cost per 5</b>	<b>Usual Quantity</b>
Ugo Fix Gentle ( catheter clip)	3004	£12.35	1 pack per month

## 7.0 Incontinence Sheaths

- Can offer a valuable alternative method of urinary continence management for men
- It is important to accurately assess for type and size of sheath using manufacturer's measuring device, prior to prescribing
- Sheaths should be changed every 23 hours
- Ordering more than one box of thirty per month may indicate poor fit, refer to continence team for advice
- The sheaths listed below are latex free

**It is recommended one box of thirty should be sufficient per month**

**1<sup>st</sup> choice**

<b>MACGREGOR HEALTHCARE LTD</b>					
QUFORA – self adhering silicone Urisheath		<b>Size</b>	<b>Cat No.</b>	<b>Cost per 30</b>	<b>Usual Quantity</b>

**Date:** 16/01/17

**Equality & Human rights Lead:**

:

**Director\General Manager:** Jane Scrafton

**\*In this template the term policy\service is used as shorthand for what needs to be analysed. Policy\Service needs to be understood broadly to embrace the full range of policies, practices, activities and decisions: essentially everything we do, whether it is formally written down or whether it is informal custom and practice. This includes existing policies and any new policies under development.**

**Section 1 – to be completed for all policies**

	Briefly give an outline of the key objectives of the policy; what it's intended outcome is and who the intended beneficiaries are expected to be	The products listed in this formulary have been selected by the Continence Formulary working Party, Lincolnshire Community Services NHS Trust, Lincolnshire localities only. Judgement was based on expert opinion and evidence of clinical and cost-effectiveness		
	Does the policy have an impact on patients, carers or staff, or the wider community that we have links with? <b>Please give details</b>	No		
	Is there is any evidence that the policy\service relates to an area with known inequalities? <b>Please give details</b>	NO		
	Will/Does the implementation of the policy\service result in different impacts for protected characteristics?	NO
